Administration of Medicine Policy

Policy Statement

A student who is unwell and unfit to attend school would normally be kept at home by the parent/carer until fully recovered. In some circumstances the Headmaster, Head of IJS, the class teacher or School Nurse may feel that students are not well enough to be in school and will arrange for their return home, having first made contact with the student's parent/carer.

It is each parent/carer's responsibility to ensure that their child is fit to attend school, and any medication required whilst the student is at school should ideally be administered by the parent/carer.

Very few medicines need to be taken four times a day. In most cases, medicines can be given before the student leaves home for school and immediately on their return from school, so that a consistently high level of the medication is maintained in the bloodstream throughout the day. The same principle can also be applied to medications such as creams for conjunctivitis etc.

A problem may arise where either the parent cannot administer the dosage, if it must be taken in school time, or the student has a chronic need of medication.

Administration of Medicine Procedure

This policy should be read on conjunction with the Allergy Management Policy which gives more detailed guidance on the use of adrenaline auto-injectors/Epi Pens in school and the First Aid Policy.

Before medicine is administered the parents must complete an 'Administering of Medication Form' available from the school receptionist in the Infant School or the School Nurse for Junior and Senior school, please see the Appendix at the end of this policy for a copy.

All parts of the form must be completed:

- Name and date of birth of the child
- Names of medicines
- Details of prescribed dosage and expiry date
- Consent given by the parent/carer for staff to administer these medicines and the duration of the administration

The Parent Consent form, providing all the information above, will be copied and retained in a central file as a record for future reference. If this information is on-going, the School nurse will ensure that it is reviewed regularly and kept up-to-date.

The School Nurse will come to the Infant School to administer the medication and, for the Junior and Senior School, students will go to the Medical Room. However, if a member of staff other than the School Nurse is to administer medication, they must first read the check list below in the 'safety checklist' section of this document.

Administration of Medicine Policy

Where administration of medicines requires medical or technical knowledge, training will be given. An example of this would be in the training given to staff on the management of allergies in a school setting and the administration of an adrenaline auto-injector/Epi pen.

Key Principles

- Students at school with medical conditions will be properly supported so that they have full access to education, including school trips and physical education.
- School will ensure that arrangements are in place to support students at school with medical conditions.
- School will consult health and social care professionals, students and parents to ensure that the needs of children with medical conditions are properly understood and effectively supported.

1. Administration

Where at all possible, all medicines are administered by the School nurse.

There is no legal duty on non-medical staff to administer medicines or to supervise a child taking it. *This is purely a voluntary role.* If staff agree to administer medicines they must first read the checklist in the procedures document.

Under no circumstances are any medication, even non-prescription drugs administered without parental approval. Parental permission for the administration of paracetamol and/or ibuprofen is obtained from parents prior to a student starting school.

2. Instruction and Training

Specific instructions and/or training is given to staff before they are required to assist with or administer medicines or medical procedures.

Such safeguards are necessary both for the staff involved and to ensure the well-being of the child. Even administering common medicines can sometimes be dangerous if children are suffering from non-related illnesses or conditions.

For staff supporting school trips and visits, the Assistant Head Co-curricular for the Senior School or the Deputy Head Academic for the Infant and Junior School, will be responsible for ensuring that relevant staff have suitable information and training, if required, to support all students on the trip or visit. This includes all Duke of Edinburgh, Scouts and CCF activities.

The School Nurse will ensure that all relevant staff are aware of a student's medical condition where necessary.

Administration of Medicine Policy

3. Children with Infectious Diseases

Children with infectious disease will not be allowed in school until deemed safe by their GP and/or the School nurse or local health authorities.

4. Safety Checklist

- Is any specific training required to administer medicines?
- Is any necessary protective clothing or equipment available?
- Has the parent completed the Medication Consent Form? Has a copy been filed?
- Is the member of staff clear on what they are expected to do?
- Is the emergency contact information, particularly for the GP and parent or guardian clear?
- Will medication be stored in the same place and at a suitable temperature?

5. Safe Storage and Disposal of Medicines

When medicines are used, staff will need to ensure that they fully understand how each medicine or drug should be stored. Storage details can be obtained either from the written instructions of the GP/pharmacist or from parents.

All medicines should be stored in the original container, be properly labelled and kept in a secure place, out of reach of children. Arrangements may be needed for any medicines that require refrigeration.

Medicines should only be kept while the child is in attendance.

Asthma Inhalers are kept in the pupils' classrooms in the Infant School. For more serious asthma conditions there is also a spare inhaler kept in the Infant Office/Reception. In the Junior School, spare asthma inhalers which have been sent in to school by Parents/Carers are stored in the Junior School First Aid Room, and in the Senior School, in the Medical Room. Junior and Senior students are encouraged to carry their own inhalers in addition to any kept at school.

Where needles are used, they must be disposed of in the 'Sharps Bin' which is available in the School nurse's office (portable bins are also available on request). Clinical waste should be disposed of in the 'Medical Bin' located in the Infant School staff toilets or in 'clinical waste' bag. Medical waste bins are also available in the Junior and Senior School and the Medical Rooms.

Any unused or out-dated medication should be returned to the parent for safe disposal.

Students should know where their medicines are at all times and be able to access them immediately. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline auto-injector/Epi pens should always be readily available to children and not locked away. This is particularly important for school trips and visits.

Administration of Medicine Policy

6. Recording

All medicine given is recorded by the School nurse in individual medical records. If staff at the Infant Department administer medicine, they record this in a file available in the Infant School Office, giving the date, time and dosage.

7. Administering of Medication

Nottingham High School will undertake to administer medication to students only upon receipt of the relevant completed form signed by the student's parent or guardian.

Administration of Medicine Policy

Parental agreement for School to administer medicine

The School will not give your child medicine unless you complete and sign this form.
