1. Aims

The curriculum provided by the School aims to offer a broad education to ensure that students leave Nottingham High School as well-educated citizens, aware of their social responsibilities and with an appreciation of the heritage, traditions and development of nature of the society that they are part of. It aims to balance the need to educate students to take their place in society. Specifically, the curriculum aims:

- a) To provide an all-round education and to give students the maximum opportunity to fulfil their individual academic potential.
- b) To provide for students' personal and social development through the GEP [PSHE] provision and through subject delivery.
- c) To ensure that all students acquire and develop academic skills and knowledge appropriate to their age, develop physical skills and develop aptitude in speaking and listening, literacy and numeracy.
 - Aesthetic and creative (including Art, Drama, DT and Music, and the Independent Year 10/EPQ project)
 - Human and Social (including Economics, Geography, History, Philosophy, Politics and Religious Studies, and the internal Year 10 project and EPQ as part of Independent Study)
 - Linguistic (including Classics, English and Modern Foreign Languages and World Languages as part of Independent Study)
 - Mathematical (not just Maths but across the Sciences, Computing and DT)
 - Physical (including PE and Games, and through an extensive Co-Curricular programme)
 - Scientific (Biology, Chemistry and Physics)
 - Technological (including Art and Design, Design Technology, Food and Nutrition and Computing and as part of the STEM project through Independent Study).
- d) To provide courses that are relevant to the needs of students, provide continuity and progression of learning, have intrinsic merit, are sufficiently flexible to allow for future modification and foster the ability to develop and communicate independent thought and ideas. The Curriculum aims to enable students to study a wide range of different subjects up to 16+ as the best possible foundation for Sixth Form study and, where possible, to select subjects they wish to study in the Sixth Form from those subjects they have already studied to 16+, with the addition of certain subjects not offered before.
- e) To reinforce the following features of the School: the vibrant atmosphere within the School as a whole, the support given to students inside and outside the classroom by highly qualified, committed and talented staff and the positive benefits of wide social access and diversity within the School community.
- f) To ensure that staff deliver a wide variety of topics without discriminating unlawfully. In doing this the school aims to ensure it maintains a culture of equality in which students protected characteristics do not experience unlawful discrimination.

- In a teaching context we aim to ensure that the way we teach particular issues does not subject individual students to discrimination. E.g. Teaching *Taming of the shrew* is not unlawful but should not become a vehicle for making derogatory generalisations about women.
 - A number of subjects are also diversifying more with the chosen topics they teach and the texts they use in line with the School's Diversity and Inclusion Policy
- g) Alongside the commitment to academic excellence, the curriculum should also help to: promote respect and tolerance for the individual and individuality, encourage the development of individual passions and enthusiasms (both curricular and co-curricular), develop the capacity for independent thinking and learning, develop the qualities of leadership, creativity, appropriate risk-taking and responsiveness in order that each student is prepared for the obligations, challenges and also the opportunities of adult life.

The curriculum does not undermine the fundamental British values of democracy, the rule of law, individual liberty, and mutual respect and tolerance of those with different faiths and beliefs. To support this statement the school curriculum and Schemes of Work include: -

- material in history lessons which promotes democracy and democratic political systems
- material that does not allow us to ignore English Civil or Criminal law and requirements of religious law cannot contravene this
- material in RS and other lessons that are designed to suggest to pupils that all religions are worthy of respect, including views of atheism/agnosticism. Teaching this does not conflict with fundamental British values. The school celebrates and embraces diverse topics such as 'Black History Month' and 'LGBTQ+ Month'.
- Texts chosen in English and other subjects reflect the diverse nature of our community

Blended Learning

The school firmly believes that having the option to harness digital platforms in face-to-face lessons enhances our teaching provision, enabling staff to teach lessons which are increasingly personalised, differentiated and collaborative. At the same time, harnessing such platforms enables our students to develop independence and a sense of ownership of their work – attributes we constantly strive to foster as a school. In seeking to develop a culture of blended learning:

- All students in the school follow the BYOD policy and are encouraged to see digital devices as an extension of their current pencil case: they can use their devices in lessons as their normal way of working, should they wish, unless there is a specific task that teachers feel does not require its use.
- Teachers will upload classwork materials and resources onto Google Classroom in preparation for each lesson, or at the start of a series of lessons.

students in all years are required to bring a device into school every day as part of our BYOD policy and are responsible for ensuring that it is charged when they get to school. Their parents are also

responsible for ensuring that it is insured on their home insurance policy. The school has a small number of devices that are loaned out on a short-term basis for a number of reasons.

Covid 19

During this period of uncertainty, within this document any aspect of teaching may be delivered in school or in a remote format. Should the school revert to a mix of remote and in school learning or to a fully remote school then separate plans are in place for this that give guidance to staff, parents and students. Following confirmed cases of COVID-19 the School also has contingency plans in place to enable teaching to continue during any temporary whole-school closures due to local lockdowns. As per the DfE guidance. Under new Covid 19 guidance students are now absent from school in the similar way to when they are off with other infectious diseases such as Flu. If this is the case no live online provision will be facilitated but for extensive absence the individual needs of the student will be considered and live online provision may be provided as they would be for any long-term illness.

2. Curriculum Management

Curriculum content and delivery is led by the Deputy Head [Academic] with the Assistant Head [Director of Studies]. The Academic Group, chaired by the Deputy Head [Academic], discusses current academic themes and may recommend items for discussion at Heads of Department meetings. Within this structure the responsibility of devising Schemes of Work and delivering the curriculum lies with the Heads of Department. Department Handbooks describe the emphasis in each year group and schemes of work guide the day-to-day work of colleagues. The work of Heads of Department is line managed by the Deputy Head [Academic] and Assistant Head [Director of Studies].

3. Programmes of Study

Year 7:

The Year 7 curriculum includes seventeen subjects and provides a broad and balanced curriculum from the outset. In many subjects the emphasis is placed upon the development and honing of particular subject-specific skills. All students study: English, Mathematics, two MFL from French, German and Spanish, Geography, History, RS, Art, Drama, Music, Biology, Chemistry, Physics, Design Technology, ICT, Food and Nutrition, PE and Swimming, Games. All students follow both an Independent Study programme and the PSHE Programme.

Years 8 and 9:

In Year 8 and Year 9 the curriculum aims to build a foundation for further academic study and also develop each subject's unique way of looking at the world, which students can then take forward into their adult life.

Year 8:

All students study: English, Mathematics, two MFLs (as in Year 7) from French, German and Spanish, Geography, History, RS, Art, Drama, Food and Nutrition, Music, Biology, Chemistry, Physics, Design Technology, Computing. PE and Swimming, Games. All students follow both an Independent Study programme and the PSHE Programme

Year 9:

All students study: English, Mathematics, Geography, History, RS, Biology, Chemistry, Physics, PE or Swimming, Games. In addition, all students choose any **four** options to include at least one from French, German and Spanish and a further three from any of Art, Music, Drama, DT, Computing, Food and Nutrition, French, German or Spanish. All students follow both an Independent Study programme and the PSHE Programme.

Years 10 and 11:

In Years 10 and 11 the Curriculum remains balanced with a substantial element of compulsory breadth. The Curriculum is designed to allow focus on subject areas, to reflect developing personal interest, whilst protecting against early specialisation and narrowing of future study and career options. It is possible that, by allowing choice, some students might not engage implicitly with aesthetic and creative options, although the increasing range of creative options and wide-ranging extra-curricular provision in these areas reduces the number of students not participating in this type of activity.

The vast majority of students study 10 GCSE subjects, however there is now a 9 GCSE pathway that is studied by around twenty students which is offered to those students that we feel are likely to benefit from more focused study on fewer subjects and additional academic mentoring. Students' study includes English Language and English Literature, Mathematics, at least two sciences chosen from Biology, Chemistry and Physics, and at least one Modern Language chosen from French, German and Spanish. In addition, all students take a balanced programme of four options chosen from: Art, Drama, Food and Nutrition, Computing, Music, Geography, History, RS, French, German, Latin, Spanish, Biology, Chemistry, Physics, Design Technology and Computer Science. GCSE Ancient Greek is available as an off-curriculum option for students studying GCSE Latin. All students take Games and PE and

Swimming. Some students complete a programme leading to an additional Maths qualification in Year 11, the OCR free standing Maths Qualification (FSMQ). All students undertake an Independent Study and PSHE Programme in Year 10. The School always looks at what is best for the individual student and sometime this means that their curriculum is specifically designed for their strengths. For example, in rare cases a student may only take one Science.

In some cases, such as long-term absence, it is possible for a student not to follow the full subject programme in Year 11 to the end of the academic year or in Year 13 to the end of the academic year. Where arrangements can be made, and are in the best interests of students, the School will enter students for additional examinations which may be in courses studied outside of School. Where students wish to request to drop a subject, procedures are in place to respond to requests from individual students or from individual Heads of Department. Where a request to drop a subject is made, the Assistant Head [individuals 7-10 or 11-13] or Assistant Head [Director of Studies] obtains reviews from subject teachers, Head of Department, Tutor, the Learning Support Co-ordinator if the student is on the SEND (Special Educational Needs and Disabilities)/LDD (Learning Difficulties and Disabilities) Register and the Head of Careers if there are any Higher Education or Career implications. Following consultation with the parents and the Tutor. The Assistant Head [individuals 7-10 or 11-13] sees the student concerned and discusses the whole picture. Once students have discontinued a subject, they do not continue to attend lessons for that course but may be given designated study periods in the library or other suitable locations.

Courses on offer up to the end of Year 11 lead to GCSE or IGCSE qualifications. The school maintains a record of the exam boards that each subject follows and this is available to parents.

Sixth Form:

The core Sixth Form Curriculum allows students to choose three subjects (plus Further Maths) in Year 12, leading to three subjects (four if the student studies Further Maths) at A2 level. The curriculum for students in the Sixth Form seeks to prepare them for the opportunities and experiences of higher education, the world of work and adult life.

There are no external AS exams (except Geography – taken in Year 13 for the last time in 2024). Students study three full A-Levels ('A2s') in Year 13, and take part in a lecture/PSHE programme that occupies at least a further two-hour long periods per fortnight. This leads to four full A-Levels for those who take A-Level Further Mathematics, and three full A-Levels for others.

The A-Level subjects currently available in the Sixth Form are: Art, Biology, Chemistry, Design Technology, Economics, English Literature, English Language, French, Geography, German, History, Latin, Mathematics, Further Mathematics, Music, RS & Philosophy, Physics, Physical Education, Politics, Psychology, Spanish and Drama. Further Mathematics is available as an additional fourth A-Level for students who are suitably qualified. Students and staff are advised that current availability does not guarantee that the same pattern of courses will be available, and options are subject to change.

Year 12 students also have the option to undertake an Extended Project Qualification (EPQ) off-timetable in Year 12. The EPQ encourages students to develop independent study skills and a breadth in their A-Level study.

4. Personal, Social, Health, Economic, Careers and Citizenship Education

The School is fully committed to providing a comprehensive programme of PSHE for all its students, which is appropriate to their age and needs. Responsibility for developing and implementing this programme rests with the Assistant Head [Individuals 7 - 10] and the PSHE Co-ordinator, working with Heads of Year. PSHE is delivered through a dedicated weekly lesson for Year 7. Year 8 and 9 have fortnightly lessons. Year 10 has time that is devoted to PSHE, as well as the School's version of the HPQ.

Topics within PSHE aid progression of key themes, as shown in the detailed scheme of work maps. Many of these skills are built on over different years where the topic dictates that it is more appropriate for layers of it to be taught at specific time. A change in focus in each year group supports further engagement of students. Citizenship themes are developed within the curriculum across the school. In line with the promotion of British Values, students are encouraged to take an interest in how such values apply to themselves through taught lessons and a cross curricular approach which seeks to embed British Values within all curriculum subjects. As active and global citizens, students are given the opportunity to take a role in the life of the School and to be prepared to take a role in wider society.

A variety of styles are used, including ICT, varied media and mixed lesson methods. If appropriate for gender related discussion; some topics are delivered to half-form groups. Lesson are delivered by PSHE staff. These members of staff have access to bespoke internal INSET provided by the School and are encouraged to access external INSET where they deem it necessary. Where session are delivered by external agencies we take care to ensure that any materials used are appropriate and in line with the School's legal duties regarding political impartiality.

Assessment forms an important part of RSHE. There are 4 key areas of assessment in PSHE; Book looks, End of unit quizzes, Observations and a review of lesson plans. These are completed by the HoY, PSHE Co-ordinator and Assistant Head Individuals [7-10] with the results of each reviewed at the end of each academic year.

The school takes all PSHE seriously and has recently developed separate schemes on the topic of RSE, for which there is a separate policy.

Skills (social, personal, presentation, debate) and topics (sex, relationships, mental health, environmental issues, law, drug awareness, sexual reproduction, healthy diet, safe use of ICT and cyber bullying) are also covered within other curriculum areas.

Careers Education:

Impartial advice is provided to support students in making decisions at key stages in their school career (GCSE options, AS/A2 options, university/college or career options). The Head of Careers takes the lead in all Years with support from HoY and the Deputy Head [Academic].

Students are encouraged to assess their own strengths, weaknesses and personal aims and to apply this understanding to their choices of higher education and future career. Individual guidance is provided by the Head of Careers, who gives independent advice, and with whom students have a one-to-one meeting. Students are encouraged to become well-informed and to explore as wide a range of options as possible to consider the implications of their decisions and the practicalities of achieving their objectives. The values of the student are key, and consultations focus on the agenda being set by the student.

The Morrisby platform is used from year 8 upwards, enabling students to more easily target their own research. At the end of Year 10 students complete an extended psychometric profile which further helps with post-16 decision making. Careers activities are recorded in the students' accounts so that progress can be easily tracked and tailored support provided. Activities are also logged against Gatsby Benchmarks to aid reporting.

Through the Head of Careers and the Individuals Team [Senior Tutors and Tutors], additional bespoke advice is given to students and, where relevant, their parents in respect of the following: GCSE courses, AS/A Level courses, university/college courses and career options.

The Programme of Careers Education is as follows:

Year 8	Autumn	Students create accounts with Morrisby and research possible careers of interest prior to making choices about GCSE subjects.
Year 9	Autumn	Students are given support to consider possible GCSE options. External careers advisors are available for parents and students at parents' evening. Students continue to use Morrisby to help research the implications of GCSE options.
	Spring	Questionnaires are completed [with parents] about possible options.
Year 10	Summer	Students are profiled using on-line psychometric tests. These generate an individual profile which the student shares with parents and tutors.
	Summer	Off-timetable week including a day's work experience and Business Dynamics Conference activities day
Year 11		<p>Students are given support to consider possible AS and A2 options. A questionnaire is completed by all students. Students meet one-to-one with the Head of Careers to discuss their Morrisby report and A-level thoughts. Notes from these meetings are shared with tutors to support decision making.</p> <p>The Head of Careers is available to meet with parents and students at parents evening.</p> <p>To introduce different careers and opportunities, Careers Evenings are organised with external speakers to introduce the world of work and career paths.</p>
Year 12	Autumn	<p>Students new to the school are given the opportunity to be profiled using on-line psychometric tests with follow up one to one guidance interviews conducted by the Head of Careers.</p> <p>Students attend talks on apprenticeships and gap year opportunities.</p> <p>Briefing on relevant work experience.</p>

	Spring	Individual guidance is provided through optional interviews with the Head of Careers. Briefings for students considering medical and Oxbridge applications are provided. General guidance on organisation of relevant work experience placements is provided.
	Summer	Students are given support and advice to consider possible university courses. Parents' information evening also takes place.
Year 13		Optional meetings with Head of Careers on university entrance and careers beyond school. Students given mock interviews in preparation for university interviews.

5. Homework

Purposeful and challenging homework is used to help raise academic achievement. By reinforcing work undertaken in the classroom, a sense of responsibility, student ownership of learning and development of skills for more independent learning are developed. Teaching staff set regular homework, check that it has been done and assess it critically to direct students towards making further progress. Homework encourages parental interest and involvement in supporting learning although assignments should always be student work. Students are responsible for completing set homework on time and to the standard of achievement expected, for them, by their subject teacher. Staff will set all homework on Google Classroom.

Subject teachers set a designated amount of homework in accordance with the current school homework schedule, offering appropriate guidance on how to tackle work and ensuring that students understand the standard of achievement expected. Students must have more than three days to complete homework (which can be handed in using different formats – paper/ electronic), encouraging them to plan their time independently. They aim to ensure time between completion of work and feedback, providing guidance to improve learning. Subject teachers keep a record of the homework (as does Google Classroom), its standard and the date of completion and apply appropriate sanctions if any homework is not completed and inform the Tutor of non-completion by an electronic 'ticket'. Heads of Department offer guidance on the nature of tasks to be set to different year groups and monitor on a regular basis the amount, quality and standard of homework set by members of their department. They encourage the sharing of good practice within the department related to homework.

Tutors monitor the homework set and completed by individual students and encourage the use of Google Classroom (To do) as a homework organiser on a weekly basis. In the Sixth Form, the Assistant Head (Individuals 11-13) and Senior Tutors help students to review their homework (also set Google Classroom). The Academic Team monitor the amount of homework set within a year group and communicate the School's homework policy to students in the year group. They encourage students

to use the Senior Library, Sixth Form Study Centre or ICT Centres to do homework during the lunch break or after school. Some students have directed library time as part of the timetable.

Parents are encouraged to monitor the homework set on Google Classroom by sitting with their child and 'logging in' out of school and communicate with the Tutor regarding homework issues.

Subject teachers consider the following points when setting homework:

1. Homework should be challenging, purposeful and useful to the student's academic development.
2. Some students tend to spend longer on homework than others, so the motivation of the individual should be recognised along with the actual time spent on an assignment.
3. Homework should ideally promote independence of learning and this should be reflected in the tasks set, although this should be in the context of appropriate support and guidance.
4. All homework tasks should be posted on Google Classroom (as well as given verbally). Guidance of how to tackle complicated homework tasks should be offered, and reinforced on Google Classroom, students should be clear on the standard of achievement required.
5. Homework may consolidate work done in the class or may prepare for a future lesson.
6. Homework may be handed in in a variety of forms – e.g. electronically or paper. Staff may insist on a particular format for some homework to ensure exam practice.
7. Numerical marks and grades alone do not improve learning, subject teachers attempt to offer advice in their comments on work (could be recorded or written) which give guidance as to how students may improve. Students may respond to these comments.
8. In the event of staff absence homework may still be set in accordance with the homework timetable just as work is set for that lesson. This can be seen on Google Classroom by all students.

Homework (Years 7 to 11):

Homework is set regularly on the days specified in the homework timetable. Students are permitted to do part of their homework at School during the lunch break, although it is generally better for them to be engaged in other school activities at that time. Teaching staff aim to estimate the time required for homework carefully to prevent one subject encroaching on the time of others and in Years 10 to 11 homework may extend, with clear stages, for more than one evening. Every effort is made to establish the homework routine during the first week of term, except for Year 7 students who start homework at the start of the second full week of term following a period of settling-in time. Tutors can monitor homework through Google Classroom and through the rewards and sanctions systems on iSAMS and discuss this with their tutees on a regular basis.

Homework in Year 7 and 8 per fortnight: (Guidance)

English and Maths 2 x 30 minutes, Biology, Chemistry and Physics 1 x 30 minutes, French, Spanish, German, 1 x 30 minutes and 1 x 15 minutes. History, Geography, RS, Drama, Food and Nutrition, Music, Art, D&T, ICT 1 x 30 minutes

Homework in Year 9 per fortnight: (Guidance)

2 * 35 minutes per subject: except English (4 * 35 minutes) and Maths (4 * 35 minutes).

Homework in Years 10 and 11 per fortnight: (Guidance)

2 *45 minutes per subject except English (4 *35 minutes).

Homework in the Sixth Form: (Guidance)

Sixth Formers are set work to support progress in each subject. This may include further reading and independent work as well as set tasks. Though Sixth Formers are expected increasingly to manage their own time, deadlines are set and are expected to be met. The time allowed for a piece of work should be proportionate to its scale; if a long essay is the only private work set in a subject for a week, a full week's notice of the deadline should be given. Especially in Year 12, students are helped by regular checking that a long piece of work is under effective control and moving through its stages towards completion.

6. Monitoring Progress, Issues with Academic Work and Homework

Monitoring Progress in Years 7 to 11:

It would be unsatisfactory if the low standard of a student's work is not discovered until the summer exam or public exam results are known, hence regular assessment is essential. Teaching staff aim to sort out all poor, late or missing work in each subject with the student concerned as soon as possible. If a student misses a deadline, that student will attend the lunchtime detention at the earliest opportunity to complete the work unless there is a valid reason. Teaching staff use the notification and sanction system, which involves the Tutor, to support the monitoring of progress which the student is making.

Interim, and full written reports are reviewed by Senior Tutors, by Tutors and members of the SMT. Students identified as underperforming (including against baseline measures) or in the bottom decile discuss their reports with Senior Tutors or a member of the SMT. Students who are performing in the top decile or performing well in relation to baseline data are also seen by Senior Tutors, the HoY or SMT in a group situation. Parents are kept informed in all cases. This review and copy of agreed targets is provided for Tutors who monitor progress. In addition, for students named in the SEND/LDD Register, the Learning Support Co-ordinator reviews grades and monitors progress.

Monitoring Progress in the Sixth Form

To aid the transition towards self-directed study at university, students are expected to spend some time during breaks or non-taught periods working quietly in the library or more informally in the Sixth Form Study Centre where work tables are provided. The senior library is reserved for self-directed study during all lesson times.

Some students in Years 12 and 13 who have shown that they need a disciplined framework for their private study periods may also be required to work under supervision either in the Library or in the Sixth Form Centre. Teaching staff use the notification system, which involves the Assistant Head (Individuals 11-13) and Senior Tutors and Tutor, to support the monitoring of progress which the student is making. If an issue is not resolved or, after two notifications to parents, subsequent work deadlines are missed teaching staff notify the Senior Tutor and Tutor again. The Assistant Head (Individuals 11-13), Senior Tutors and Tutor will work with the student to help the student to establish

a structured approach to work before the matter is referred to the Deputy Head [Individuals]. The Individuals Teams works with the Academic Team to discuss actions with teaching staff.

Interim and full Sixth Form written reports are reviewed by Senior Tutors and Tutors and members of the SMT. Students identified as underperforming [including against baseline measures] discuss their reports with their Tutors and in some cases Senior Tutors. Students who are performing in the top decile or performing especially well in relation to baseline data are also seen by the HoY or SMT. In addition, for students named in the SEND/LDD Register, the Learning Support Co-ordinator reviews grades and monitors progress.

Coursework/NEA and controlled assessments

Departments devise coursework assignments to fit within their allocation of lesson and homework time. At any stage where a programme of assessable coursework is being undertaken in homework time, an essential timetable of what must be done by which date is prepared, making sure that no student falls behind and build up an insurmountable backlog. This is particularly important in Year 11, where students may be trying to juggle a heavy load spread across three or four subjects. They often need a good deal of advice and consideration. Tutors and parents are informed if a student fails to meet submission deadlines for coursework. Heads of Department ensure consistency of approach to coursework in their departments. Appropriate checks are made on coursework, bearing in mind that Examination Boards place the onus on schools to ensure that the work is the student's own.

7. Special Educational Needs/Learning Difficulties and Disabilities

The School provides for those students with special education needs [SEN] and those with learning difficulties and/or disabilities [LDD], referred to as SEND. The School's provision in this respect is coordinated by the Learning Support Co-ordinator in the Senior School who works closely with the Deputy Head [Academic]. A separate policy 'Support for Learning – Senior School' is available.

Where a student has an Educational Health Care Plan (EHC plan) [statutory assessment], the Learning Support Co-ordinator will liaise with teachers to ensure that the education received fulfils its requirements. Though it is not the responsibility of the School to review EHC plans annually, the Learning Support Co-ordinator will endeavour to ensure that, for any student with an EHC plan, their Local Authority has conducted a review. It is the policy of the School that where a student has a recognised learning difficulty or disability, the Learning Support Team will include the student's name in the SEND/LDD Register and provides copies of individual student learning support records for subject teachers.

A student is not regarded as having a learning difficulty solely because the language or form of language of the home is different from the language in which they are or will be taught. As our students have been assessed in English as part of the School's selection processes, no additional provision is made for teaching 'English as an Additional Language', however students may receive additional support outside of lesson time in this area. Should this need arise, we would discuss with parents the best way forward. In all three sections of the School, all external candidates are spoken with as part of the assessment process so that we can be sure that they are able to speak English to a sufficiently high standard to be able to access lessons.

Staff ensure that they adjust their lessons so far as reasonable to ensure that students with disabilities are not put at a substantial disadvantage. It is crucial that all students make good progress according to their ability.

8. Gifted and Talented – Departments and the 1513 Society

The school encourages all students to excel. The 1513 Society is for students who show academic ability at the very top of their year group. This is observed through baseline data, regular reports and end-of-year exams. Students meet as Year 7, and then paired year groups above this. Students must continue to perform at the highest level to maintain in the Society. Reviews of the students involved are carried out regularly.

The Society meets each half term to look at progressing skills beyond the current academic offering in the classroom. This is not subject based but much broader looking at analysis, hypothesis and then looking at communication and presentation skills. The ability to question others also forms a large part of the programme, encouraging debate.

In lessons, all departments encourage students to extend their knowledge. Each department will differentiate their lessons and stretch all students to their potential. In addition, they will encourage students to enter competitions, these may be team based or individual essays. Departments also have individual programmes alongside a central programme to support the highest level of Oxbridge application.
